

EH&S Specialist

Job Description:

InnovaLight is seeking a highly motivated and result oriented Environmental Health and Safety (EH&S) specialist to manage and administer the development, implementation, and maintenance of EH&S policies and procedures.

The responsibilities of this role included but not limited to the following:

- Lead EHS programs
- Develop, implement and review EHS policies and procedures
- Participate in process safety reviews for equipment/tool installation, qualification or relocation
- Serve as primary contact and interact with regulatory agencies in routine communications, reporting, and special projects
- Maintain safety records and provide regular reports and safety updates to management
- Coordinate monthly safety reviews and follow up on actions required
- Materials shipping management

Qualifications:

- BS degree in Chemistry, Environmental Science, Chemical Engineering or related discipline.
- 3+ years experience in EH&S compliance in a commercial and/or manufacturing environment.
- Experience in a chemical or chemical related manufacturing environment.
- Knowledge of government EH&S regulations and standards.
- DOT and IATA shipping training/certification is desired
- Excellent verbal and written communication skills required
- Must have the ability to work under minimal supervision and direction and to exercise sound judgment
- Must be comfortable in utilizing a variety of personal protective equipment and work hands on with hazardous waste removal
- Certification in Industrial Hygiene preferred
- Experience in incident command and control protocol is a plus
- Facility and Security experience a plus
- Working knowledge of PSM (Process Safety Management) and RMP (Risk Management Programs) as they apply to chemical production is a plus.
